Paint and Stain colors are computer generated digital images. Actual color may vary.

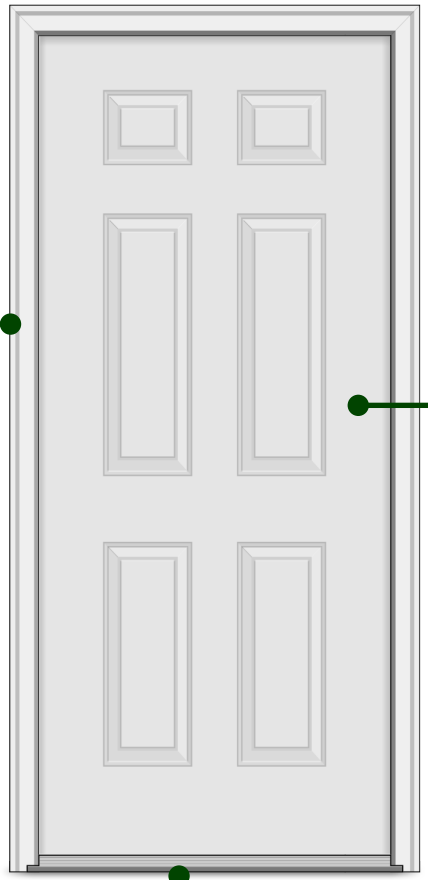

COMPOSITE EXTERIOR DOORS
KEYSTONE DOORS ADVANTAGE

Strength Where It Matters Most.

The Keystone Door is tested in accordance with AMMA standards. They are designed to perform structurally to the highest levels, achieving an overall DP50 rating. This performance provides you with an entrance to your home that will secure you against the attacks of nature.

Brickmould Back Screw Application
- Enhanced structural fastening
- No exposed exterior fasteners
- Improved curb appeal
- Cleaner finished appearance

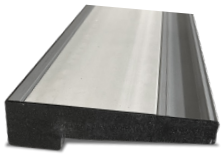

4 1/2" wide LVL Vinyl Wrapped Lock Stile
- Increased structural integrity
- Superior hardware support
- Enhanced resistance to water penetration
- Built for high-performance applications

1-1/2" Wide LVL Vinyl Wrapped Hinge Stile & Top Rail

Composite Bottom Rail
- Composite construction helps eliminate exposed wood
- Improved moisture resistance
- Increased structural stability

Composite Skin Technology
- 2.0mm skin thickness for added structural performance
- Advanced composite formulation for enhanced impact resistance
- Designed for durability in demanding environments

High Performance Composite Sill
- Full composite substrate for superior durability
- Neoprene end gaskets help eliminate water infiltration
- Engineered for long-term performance

COMPOSITE EXTERIOR DOORS
KEYSTONE COMPOSITE vs. FIBERGLASS SKIN

excel HOMES

Stronger Doors Start With Composite

Next generation composite skins engineered for strength, stability and safety. **KEY IMPROVEMENTS THAT MATTER.**

25% **HIGHER BENDING STRENGTH**
Resists warping and cracking for a straighter, stronger door.

17% **HIGHER IMPACT STRENGTH**
Stands up to daily use, shipping and job site handling

PASSED FLAME RETARDANCY TEST
Meets safety standards for peace of mind.

BETTER THERMAL STABILITY
Consistent performance in high heat and extreme temperatures.
